

## Why should you choose an AyurSEVA operation?

- Minimal pain
- Short stay in hospital lowers costs
- No recurrence
- Faster healing
- Fully Ayurveda-based management, hence no side effects
- Safe in patients who are otherwise not fit for surgery, such as diabetics and the elderly or weak
- Does not cause incontinence (sphincter disturbances)
- Minimum scar formation

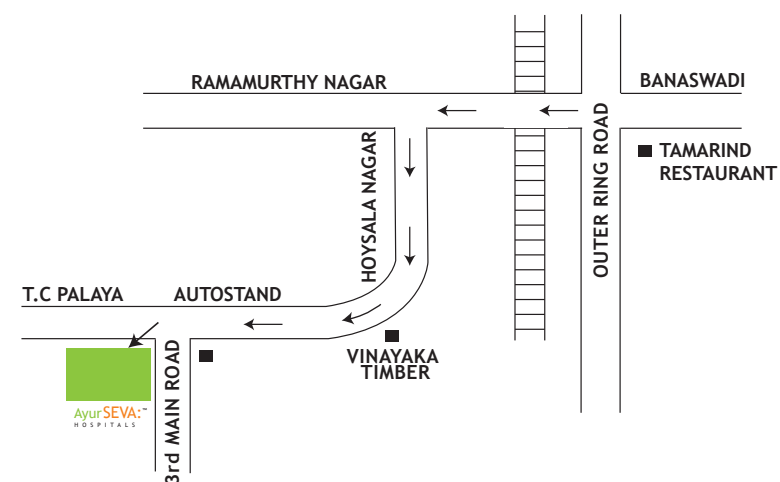

Ramamurthy Nagar

**AyurSEVA:** Hospital is a member of the AyurVAID group of hospitals, a new generation Ayurveda hospital chain with six hospitals across India- Kochi and Aluva in Kerala; Domlur and Ramamurthy Nagar in Bangalore; Hubli and Mumbai. The AyurSEVA hospital is a 15 bed facility that offers a full range of out patient and inpatient medical services, including comprehensive Panchakarma and other classical Kerala Ayurveda treatment procedures. The hospital has an inhouse pharmacy and all necessary infrastructure and services for complete Ayurveda inpatient care.

Ramamurthy Nagar

## AyurSEVA: HOSPITAL

In Ayurveda, surgery is a well developed, scientifically tested and proven solution for a variety of ailments. Classical Ayurveda parasurgical (non-invasive) procedures such as Kshara Karma, Kshara Sutra, Agni Karma, Raktha Mokshana are performed under the strict protocols of AyurSEVA hospitals. The department of surgery at AyurSEVA can be considered as a treatment of choice for the following medical conditions:

### Operation Theatre

Fully-equipped operation theatre offers the most effective Ayurveda surgical and parasurgical (non-invasive) medical management.

### Experienced Physicians

All our procedures are done under the guidance of experienced physicians.

### Lady Surgeon for female patients

AyurSEVA hospital has a specialist lady surgeon who can attend to female patients upon request.
